

Introduction

“Want to try our dispatch system with a real device?”

We would like to introduce our eJob Dispatch Device

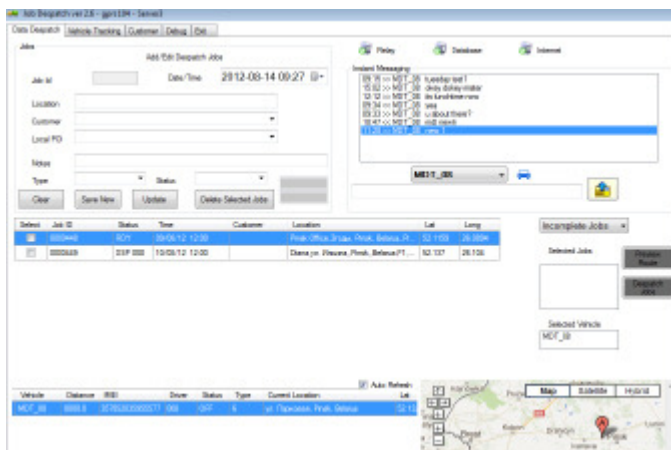

The eJob Dispatch System consists of

1. One user Job Dispatch account
2. One Mobile Device with PAYG Sim card (MDT Connected device preloaded with all required software)

Setup and Running

1. First, order for delivery our eJob Dispatch Device £190 inclusive
2. Simply download and install the Desktop Booking Application and install MySQL ODBC connector 5.1 (32 or 64bit)

The Booking Application is designed to run on any basic Windows XP or Windows 7 type systems.

The Booking Application will also need access to Internet connection e.g. ADSL, 3G or Wi-Fi

Client Demo Device

The Windows CE 6 client device comes preloaded with Dispatch Software and Sygic Fleet 10 Europe Maps and a sim card (depending on specific country requirements)
